I was one of Beth and "Burry", t w i n the room was lighted only by the four who attended and learned this course.

> Then we started 2 miles out of Elba on the Elba Hill, with catepillars. We built underground terraces, bridges, and oads for the farmers. We wound up with 14 machines working 24 hours a day.

I am qualified for the County Commissioner District 4 of Coffee County, subject to the Democratic primary election May 3, 1960, as I have 7 YEARS EXPERIENCE IN THIS TYPE WORK. Your Vote for me will be highly appreciated.

One Touch and Washer Takes Over

letting the washer make all the rest of your laundering decisions for you Designed into the clean-looking back panel of this Single Control automati-washer is all the know-how of the laundry experts. The correct procedure for any type of load is covered by one of the clearly labeled buttons. If you want to only rinse or just spin-dry, these procedures also are available at the touch of a single button. The back panel of this Maytag automatically lights up while the washer is in operation.

The ultimate in simplicity to answer the homemaker's increasingly complex laundering questions has arrived in the form of a new Single Control automatic washer, according to John B. Wise of Elba and Brantley Furniture Co, Maytag dealer here.

Just introduced by the Maytag company, the Single Control automatic washer provides the busy or novice homemaker with all the experience and know-how of the laundry experts at the touch of a single button!

She needs only determine the type of load to be laundered and press one button. The washer then takes over to automat cally provide the proper wash time, water temperature and evel, agitation and spin speeds and any special procedures necessary to provide the very best possible results for tha ype of load.

Unlike the Cape Canaveral complexity of some modern appliance controls, the Single Control washer's back panel contains only a single row of 10 push-buttons; each clearly marked to describe a type of washload. The buttons read: DELI-CATE, WOOL, WASH'N WEAR, FULL WHITE LOAD, PAR-TIAL WHITE LOAD, FULL COLORED LOAD, PARTIAL COL-ORED LOAD, BRIGHT COLORS, RINSE and SPIN-DRI. The latter two do just what they say, in the event the homemaker wishes to perform these functions only.

For those many women who prefer to supply their own laundering "receipts", Maytag continues to offer its current All-Fabric washer with fully flexible controls. Both washers are identical except for the control panel. Both are matched by the same deluxe No-Vent or Halo or Heat gas or electric clothes dryers.

For the homemaker who's too busy, bored or bewildered to bone up on the latest laundering techniques, the perfect so lution is Maytag's Single Control automatic washer.

CD's a Vital Part of Farm Safety

Civil and Defense Mobilization Director Leo A. Hoegh in a Farm Safety Week statement urges farmers to accept Rural Civil Defense as a vital part of farm safety in this nuclear age.

Mr. Hoegh said Farm Safety Week, July 19-25, serves to remind farmers of the need to recognize and support the objectives of the Farm Division of the National Safety Council.

He said: "This nation cannot survive and recover from attack without its farmers, Rural America has always carried a heavy burden in times of national emergency. In this nuclear age, it is more important than ever before."

Mr. Hoegh pointed out that fallout shelter and stock it properly. This means providing a two-week supply of food and water, a battery radio, a first-aid kit, flashlights, bed-

In the first year of my administration, all new superintendents were invited to form an association, at Auburn, to assist us in our new work. At these meetings, one of the major problems, we felt, was a need of instructional improve ment. We presented a plan of procedure to the Ford Fuondation and were given a grant for a 3-year scholarship fo principals and teachers in these counties with new superinendents. This grant will end the summer of 1960, but we are very hopeful that we will be able to obtain a 5-year grant at the end of this summer. Several of the teachers will be able to get their Masters or Double A degrees at the end of the summer because of this. Many others have gone to other colleges and completed their B. S., Masters and Double A degrees. The thing that I am most proud of is this renewed inerests that all teachers have taken to improve themselves and the classroom instructional program of the county. Also my deep appreciation of the helpful relationship with the two City Systems, and their very cooperative superintendents, Mr. S. J. Casey and Mr. J. R.

In the 3 years, the bus drivers have gotten a raise from \$60.00 a month to \$80.00 a month for the year 1959-60. This is not much as they deserve for the fine job they are doing in transporting our children safely to school, but no more money was provided by the legislature for transportation. A recommendation was made to pay \$110.00 per month but no money was appropriated to pay it.

We have not been able to improve very much on the \$500,000.00 State Bond Issue.

Circuit Judge T. Worth Thagard of Greenville will decide a civil suit brought by the Coffee County School Board against the City of Elba to collect \$60,000 which the county board claims is due for school construction in this city. The testimony was taken by Miss Gladys Clark, as Circuit Court register, and will be transcribed by a court reporter for submission to Judge Thagard. Judge Paul was disqualified because he was circuit solicitor in 1947 when bonds for school construction were issu-

The board claims the city had failed to live up to its contractual agreement to pay \$96,000 representing a county board issue of revenue warrants for construction of a gymnasium and lunchroom at the Elba school in 1947. Under the contract, it is claimed, the city was to have 1953, five and a half years af-

ter starting. The city claims it cannot afford to make the payments and that the amount involved exceeds the city's constitutional debt limits.
